

LUMO LEAD FITTING INSTRUCTIONS

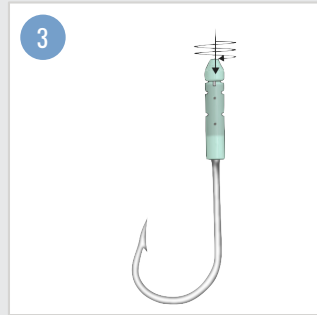

Sliding lead fitting

1
Loosen the cap, but do not remove. Slide the line through the lead ensuring the hook sits at the opposite end to the cap.

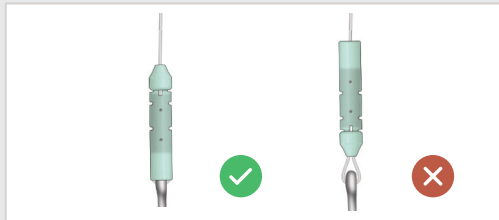

2
Slide the lead all the way down to the hook. If possible the bottom of the lead should sit over the hook eye.

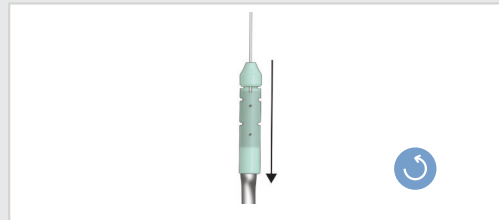

3
Tighten the cap firmly by hand so that it grips the line.

Safety and correct use of the lumo sliding lead

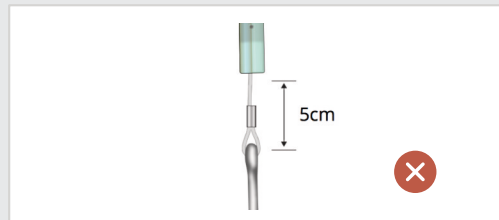

Ensure the correct orientation of the Lumo Sliding Lead

Check each lead after use and push them back down to the hook if necessary

There should be no crimps or other obstructions fitted to the line between the lead and the hook fitting, as this will prevent the lead from safely sliding down the branch line in the event of a bite off.

Sliding Lumo Leads should not be placed at a distance greater than 5cm from the hook on vessels using a bait caster.

✓ For use with mono-filament lines 2.5mm in diameter or under.

✗ Not for use with steel leaders

TECHNICAL SPECIFICATIONS

Dimensions	73mm x 15mm x 15mm
Weight	45 or 60 grams
Depth rating	> 5000 meters
Light	Glow for up to six hours
Ease of use	Easy to attach and locks to line with a patented collet line grip
Effectiveness	No reduction in target catch
Housing	Lead encapsulated in a durable, luminescent nylon sheath

Lumolead model variations

LUMOLEAD - 45G

Colour Options	Luminescent (glows for 6 hours)
	Black (doesn't glow)
	Natural (doesn't glow)

LUMOLEAD - 60G

Colour Options	Luminescent (glows for 6 hours)
	Black (doesn't glow)
	Natural (doesn't glow)
